

OTIENO JOHN PAUL ODHIAMBO

COMMERCIAL DATA & REVENUE GROWTH ENGINEER

Nairobi, Kenya | 0707 040 223 | paulodhiamboj@gmail.com | otienopaul.github.io | linkedin.com/in/otieno-p

PROFESSIONAL SUMMARY

Commercial Data & Revenue Growth Engineer bridging business intelligence, financial forecasting and performance marketing to build predictable revenue engines for hospitality and commercial brands. Founder of StayFlow, a hospitality growth company auditing data infrastructure, architecting Meta CBO/CAPI ad systems, and modelling the financial outcomes behind them. Delivered a forecasting model reaching ~95% accuracy, a 13–20% net revenue lift from OTA channel recovery, and Meta tracking setups built to an 8.0+ Event Match Quality standard. Combines SQL, Python and Power BI analysis with hands-on campaign execution to connect marketing and operational activity to measurable revenue, not vanity metrics.

CORE COMPETENCIES

- Paid Media & Campaign Architecture:** Meta CBO consolidation, Advantage+, CAPI/Pixel tracking, Event Match Quality (EMQ), full-funnel awareness-stage targeting.
- Marketing Analytics & Data Engineering:** Power BI & SQL dashboards, Python/Pandas data cleaning (ETL), predictive modelling (Scikit-Learn), NLP sentiment analysis.
- Commercial Modelling & Strategy:** Financial & demand forecasting (advanced Excel), OTA revenue recovery and pricing restructuring, executive stakeholder mapping, customer segmentation (RFM).
- Conversion Copywriting & Automation:** AIDA/PAS/BAB copy frameworks, behavioural pricing (anchoring, loss framing), n8n and Python workflow automation.

TECHNICAL SKILLS

Power BI · SQL · Python (Pandas, NumPy, Scikit-Learn, NLP) · Advanced Excel (forecasting, scenario modelling) · Meta Ads (CBO, Advantage+, CAPI, Pixel) · Google Ads & Analytics · n8n Workflow Automation · WhatsApp Business API · CRM & API Integrations · Git & GitHub

PROFESSIONAL EXPERIENCE

Founder & Commercial Data / Revenue Growth Engineer — StayFlow

Jan 2026 – Present

Nairobi, Kenya

- Lead a five-person freelance team delivering data-backed growth campaigns for hotel clients, from tracking audit through paid execution and reporting.
- Audit each client's tracking infrastructure (Meta Pixel, CAPI, Event Match Quality), OTA distribution and competitive position before recommending any campaign.
- Architect consolidated Meta CBO campaigns with Advantage+ placement and learning-phase discipline, built around defined guest segments rather than a single generic offer.
- Apply conversion copywriting frameworks (AIDA, PAS, BAB) and awareness-stage targeting to paid creative, including 9:16 vertical hook scripting.
- Built a desktop outreach application (Python, SQLite, Outlook Automation) that replaced a manual spreadsheet process, tracking 80+ leads per campaign automatically.
- Audited over 100 hotel properties to build the client pipeline; currently deliver for 3 active clients with 5 more in active discussions.

IT Manager — Sagana Getaway Resort

Jun 2024 – Apr 2026

Progressed from IT Assistant Manager; carried digital marketing and revenue-analytics responsibilities alongside core IT duties — Kenya

- Identified that the resort's Booking.com account had been deactivated over unpaid commissions; negotiated a structured payout plan to restore access and restructured OTA pricing to protect margins after commission.
- Reactivation and repricing delivered a 13% revenue lift within three months, with the channel growing to represent roughly 20% of total resort revenue.
- Built a multi-variable Excel and Power BI forecasting model for demand, labour allocation and procurement, reaching ~95% accuracy over a five-month period.

- Managed the resort's social media, website and Meta/Google Ads support alongside IT operations.
- Administered the resort's IT environment — networks, Wi-Fi and the HotelMaster property management system (PMS).
- Flagged inefficient marketing spend to management, supporting a shift toward ROI-focused campaign budgeting.

SELECTED PROJECTS

Direct Booking Growth & Behavioral CRO Framework — Self-directed · Behavioural Economics, Conversion Rate Optimization

- Designed a 4-stage behavioural framework for an independent boutique hotel in a dense urban market, applying price anchoring, choice architecture and loss framing to reduce OTA commission leakage and booking-engine drop-off.

Market Intelligence: East African Hospitality Report — Self-directed · Market Research & Strategic Planning

- Produced an executive briefing on shifting domestic vs. international hospitality demand in Kenya, identifying why legacy properties lose share to agile, boutique-style stays.

Job Simulations — Forage (clearly labelled as simulations, built to client-delivery standard)

- **Strategic Growth & Financing Model Evaluation (BeyondTech):** designed a 14-question MECE consumer survey across 450 global respondents and an executive stakeholder map (CFO, CMO, CTO, Sales, COO) behind a mobile device financing recommendation.
- **Predictive Consumer Analytics & Sentiment Modeling (British Airways):** web-scraped and cleaned customer review data, applied NLP sentiment scoring, and trained a classification model (Scikit-Learn) to predict booking behaviour from journey features.
- **Multi-Channel Marketing Campaign & Conversion Optimization (BCG):** evaluated ad performance (CTR, CPA, ROAS) across channels and built a customer segmentation and budget re-allocation model in Excel to improve conversion efficiency.

EDUCATION

BSc, Information Technology

Sept 2020 – Aug 2024

Kenya Highlands University — Business Information Systems, Data Communication & Networks, Statistics for Computing
