

OTIENO JOHN PAUL ODHIAMBO

DIGITAL GROWTH & CUSTOMER ACQUISITION | MARKETING ANALYTICS

Nairobi, Kenya | 0707 040 223 | paulodhiamboj@gmail.com | github.com/otienopaul

PROFESSIONAL SUMMARY

Digital Growth and Customer Acquisition professional with hands-on experience planning and running paid acquisition campaigns, segmenting customers, and reporting marketing performance against revenue. Founder of StayFlow, a hospitality growth company that uses market research and targeted Meta and Google campaigns to generate qualified leads and bookings for hotel clients. Combines campaign execution with SQL, Python, Excel and Power BI analysis to connect marketing activity to measurable outcomes — leads, conversion, acquisition cost and revenue — and to translate findings into recommendations management can act on.

CORE COMPETENCIES

Digital Growth: Growth Strategy, Digital Channel Optimization, Market & Competitor Analysis, Digital Campaign Management, Conversion Optimization

Customer Acquisition: Lead Generation, Customer Segmentation, Paid Acquisition, Acquisition Funnel Analysis, Customer Journey Optimization

Marketing Analytics: Campaign Performance Analysis, Customer Behaviour Analysis, KPI Development, Dashboard Development, Revenue & ROI Analysis

Commercial Growth: Revenue Analysis, Forecasting, Offer & Product Performance, Marketing Investment Optimization

TECHNICAL SKILLS

Power BI · SQL · Python (Pandas, Matplotlib) · Excel · Google Analytics · Google Ads · Meta Ads · Google Search Console · Marketing Automation (n8n) · CRM & API Integrations

PROFESSIONAL EXPERIENCE

StayFlow — Founder & Digital Growth Strategist

Jan 2026 — Present | Nairobi, Kenya

- Lead a five-person freelance team delivering digital growth campaigns for hotel clients, from acquisition strategy through paid execution.
- Conduct market and competitor research to identify guest segments and growth opportunities before recommending any campaign.
- Design and manage **Meta and Google Ads** campaigns built around defined customer segments — families, corporate travel, seasonal visitors — instead of a single generic offer.
- Track campaign performance against **leads, bookings and revenue** as the primary success measures, rather than reach or engagement alone.
- Work directly with hotel sales, marketing and front-office teams to keep acquisition activity aligned with real booking capacity and business goals.
- Currently deliver for **3 active clients (5 more in active talks)** after evaluating more than 100 prospects — positioning every campaign around measurable commercial return.

Sagana Getaway Resort — IT Manager

Jun 2024 — Apr 2026 | Kenya

Progressed from IT Assistant Manager; also carried digital marketing and revenue-analytics responsibilities

- Identified that the resort's Booking.com channel had gone inactive over unpaid commissions, recovered account access, and redesigned OTA pricing to stay profitable after commission.
- Reactivation contributed to a **8% revenue increase within three months**, growing to roughly **13% of total revenue** within the following period.
- Supported Meta and Google Ads campaigns and managed the resort's social media and website presence.
- Flagged inefficient marketing spend to management, contributing to a more ROI-focused approach to campaign budgets.
- Built **Power BI and Excel dashboards** tracking revenue, demand and product performance, used to inform pricing and promotion decisions.
- Analysed sales and customer segments to identify high-performing products and demand patterns, supporting more targeted marketing and procurement decisions.
- Developed a forecasting model covering revenue, demand and staffing that reached approximately **85% accuracy** under the testing approach used, supporting commercial planning.

SELECTED PROJECTS

StayFlow Outreach Engine

StayFlow · Python, SQLite, Outlook Automation

- Built a desktop application that automates and tracks personalised outreach emails to prospective hotel clients — replacing a manual, error-prone spreadsheet process across 80+ leads per campaign.
- Automatically updates each lead's contact status and logs full campaign history, keeping StayFlow's acquisition pipeline and outreach records in sync — the marketing automation and process-improvement work behind the client pipeline described above.

Customer Booking Behaviour Analysis

Forage · Python, Pandas, Scikit-learn

- Analysed simulated customer booking data to identify factors most associated with booking behaviour, then built a classification model to test those findings.

Retail Customer Analytics Simulation

Forage · Python, Pandas, Matplotlib

- Analysed purchase-frequency, customer segments and product performance to evaluate which segments and products generated the strongest commercial value.

EDUCATION

BSc, Information Technology

Sept 2020 – Aug 2024

Kenya Highlands University — Business Information Systems, Data Communication & Networks, Statistics for Computing
