PROFESSIONAL SUMMARY

Digital growth specialist and business systems strategist who turns data into bookings, revenue and repeat customers. Recovered a resort's lead channels for a 13% revenue lift, built demand forecasting models at over 85% accuracy, and founded StayFlow, a growth practice that has audited 100+ hotel properties. Combines an IT degree and hands-on systems background with performance marketing (Meta Ads, Pixel, Conversions API), analytics (Power BI, SQL, Python) and custom-built software to connect marketing spend to measurable revenue.

CORE SKILLS

- **Growth & Acquisition:** Meta Ads (CBO campaigns), Meta Pixel and Conversions API (CAPI), funnel and conversion rate optimization (CRO), lead generation, direct booking strategy, OTA channel management, ad copywriting, short-form video hooks
- **Analytics & Business Intelligence:** Power BI, SQL, Excel revenue and demand models, Python (Pandas), data cleaning, KPI reporting, customer feedback analysis
- **Business Systems & Automation:** CRM and sales pipeline design, WhatsApp automation (n8n, WhatsApp Business API), Outlook integration, process and workflow design, property management systems, databases, networks
- **Software Development:** Python, SQLite, Windows desktop application development
- **Leadership & Commercial:** Team leadership, client audits and strategy, pricing and revenue management, fundraising and partner outreach

PROFESSIONAL EXPERIENCE

Founder, Growth & Revenue Analytics **Jan 2026 – Present**

StayFlow (Bloq Technologies) · Nairobi, Kenya

- Audited 100+ hotel properties' tracking, OTA distribution and competitive position to identify growth gaps; now delivering for 3 active clients with 5 more in active talks
- Lead a team of five delivering client campaigns, audits and content
- Architect Meta CBO campaigns around specific guest segments and judge them on leads, bookings and revenue rather than impressions
- Fix tracking first (Meta Pixel, CAPI, Event Match Quality) so every ad shilling ties back to verified bookings
- Built a WhatsApp lead-response automation (n8n, WhatsApp Business API, Google Sheets) with intent detection, Swahili/Sheng keyword support and a human-escalation handoff to capture enquiries around the clock
- Built a hotel CRM and a multi-sheet revenue forecast model (three scenarios, staffing and inventory planning) used to show clients the financial outcome before they spend

IT Manager (previously IT Assistant Manager) **Jun 2024 – Apr 2026**

Sagana Getaway Resort · Kenya

- Lifted resort revenue 13% by reactivating inactive, underperforming lead generation channels and restructuring pricing; the channels grew to 20% of total revenue
- Built a Power BI and Excel forecasting model that reached over 85% demand accuracy, guiding staffing, purchasing and room allocation
- Managed the resort's social media, website presence and Meta/Google ad support alongside the core IT role

- Ran the IT environment: networks, Wi-Fi, databases and the hotel property management system

Co-Founder **2023 – Present**

Touch a Life Add a Smile (community initiative) · Kenya

- Coordinate a seven-person volunteer team that planned three major events reaching 1,400+ students
- Raised over KES 100,000 per event by matching the initiative with company community programmes

IT Support & Graphics Designer **Dec 2018 – Sep 2020**

Ebenezer Computer College · Nairobi, Kenya

- Designed graphics and visual materials for the college and ran the computer lab, teaching basic computer literacy

SELECTED PROJECTS

- **EmailIntel (Python, SQLite):** Lead discovery tool that finds, parses and scores public business contacts; cut prospect research time by an estimated 80%
- **Success Outreach Platform / Hodi (Python, SQLite, Outlook):** Windows desktop app for structured outreach, lead tracking and pipeline flow, with encrypted data and a packaged installer
- **Direct Booking Growth & Behavioral CRO Framework:** Customer journey and funnel plan for a boutique hotel to lift direct bookings and reduce dependence on OTAs
- **Revenue Forecasting Engine (Power BI, Excel, SQL):** Demand and revenue model behind the 85%+ forecast accuracy
- **Full case studies:** otienopaul.github.io

EDUCATION

BSc Information Technology **2020 – 2024**

Kenya Highlands University
